

Apple Day – How to Make Apple Pigs

You will need:

2 red apples
(one small, one large – preferably with leaves and stem)

6 toothpicks or cocktail sticks

6 silver balls
(cake decorations)

1 slice lemon
(if you have one)

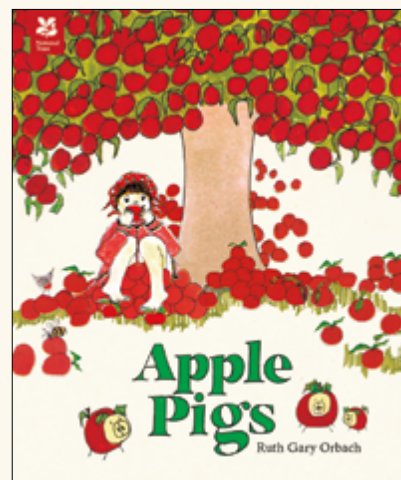

1 pipe cleaner for tail
(if large apple has no stem)

scissors

apple corer or knife

1 extra toothpick or cocktail stick or sharp pencil

- 1 Hold large apple on its side. Insert 4 toothpick (or cocktail stick) legs.
- 2 Cut small apple in half. Attach one half to body with 5th toothpick (or cocktail stick). Make sure cut side is facing outwards, to make face.
- 3 For the snout, cut a cylinder shape from the other half of second apple (use corer or knife). Fasten snout to face with 6th toothpick (or cocktail stick). Make holes for nostrils, using another toothpick or a sharp pencil.
- 4 Using toothpick or pencil, make two very small holes for eyes and insert silver balls. Make slits on top of head and insert leaves to make ears. If the apple had no leaves the ears can be cut from what's left of the apple skin.

Apple Pigs by Ruth Orbach is a charming classic picture book about nurturing an apple tree that produces a bumper autumn feast for man, bird and woolly beast. Celebrate apple days and autumn harvest-time with this new National Trust edition, to be published in hardback in August 2015.
