

Environmental arts projects

Either a one day workshop creating beautiful things to take back to school whilst exploring the details of the woodland habitat... or we love working with schools over a longer period, being involved in arts projects, interpreting environmental awareness, habitat, ecology and sustainability. Get in touch to discuss any project ideas.

One Day Workshop

Themed around the animal kingdom with a mix of green wood work, tool use, charcoal making and drawing techniques, willow weaving and also hands on investigation of UK mammal skull collection and bird feathers. You take home a giant wooden sculpture for your school grounds, plus each child takes home their own artwork.

- Invertebrates: Collaborative wood sculpture of a giant centipede to take back to school
- Birds: Charcoal making, feather and wing structure investigation followed by charcoal techniques to create bird themed drawings
- Mammals: Skull identification of UK mammals including teeth structure of different animal groups. Comparing with bird skulls.
- Fish: Weaving willow fish (each child will take home their own fish)

All sessions fully risk assessed and delivered by First Aid trained, DBS checked practitioners. £315 per group, max 30, including materials.
