

FORMBY JUNIOR NATURE RANGERS AUTUMN

Now it's getting dark earlier why not stay a little later and see if you can spot some of our friends who come out at dusk.

Keep your eyes and ears open for flocks of birds coming in to roost, what types did you see?

Look out for red squirrels scurrying around the woodland floor storing food for winter. Don't forget to tell the ranger at the entrance how many you saw.

How many different types of leaves can you find on the woodland floor? Trace round them on the back of this sheet and colour them in when you get home.

As you are walking through the woods look out for fungi on the trees or the ground.. They come in all colours, shapes and sizes. Please do not pick or eat them as they may make you ill.
