Charles Wade purchased Snowshill Manor in 1919. It became a home and stage for his growing collection of handmade and, sometimes, unusual objects.

How to build your own Snowshill Manor

1. Carefully cut along the red lines on the house and roof separately
2. Fold along the blue lines.
3. Fold tabs to 90 degrees
4. Roughly construct the shape of the house (follow the illustration below)
5. Stick the tabs (outlined with red) with glue, or make a cut along where the tab meets the model that is wide enough to slot the tab inside.
6. Start collecting your own treasures!
